

ABDURRAHMAN

+62 81398 515784 | abdurrahmanaikon@gmail.com | www.linkedin.com/in/abdurrahman-8719092b1 | [PORTOFOLIO](#)

Full Stack Engineer and Informatics student at Telkom University with experience in developing AI-powered web applications, OCR document intelligence systems, and cloud-based solutions. Skilled in building end-to-end applications using modern technologies such as Next.js, Node.js, Laravel, React, and cloud platforms including AWS and GCP. Experienced in integrating AI workflows, LLM technologies, REST APIs, and database systems into scalable business solutions.

Actively involved in teaching assistant programs, research projects, and AI innovation initiatives that strengthen communication, collaboration, and problem-solving abilities. Passionate about software engineering, AI implementation, and digital transformation, with a strong motivation to continuously learn and contribute to impactful technology projects..

EDUCATION

Telkom University - Bandung, Indonesia <i>Bachelor of Science in Informatics (Distance Learning Program)</i>	Aug 2025 - Now
Telkom University - Bandung, Indonesia <i>Diploma in Information Systems, GPA: 3.81/4.00</i>	Aug 2022 – Jul 2025
MA Al-Ukhuwah - Sukoharjo, Jawa Tengah <i>Department of Islamic Education and Arabic Language</i>	Jul 2018 - Jun 2021

ACHIEVEMENTS

- **Passed Funding Stage Program Kreativitas Mahasiswa 2023 “PKM”** - Successfully securing funding for the Program Kreativitas Mahasiswa competition in 2023 category for the Application of Science and Technology “PKM-PI”.
- **1st Winner Business Idea Competition 2023 by Bandung Techno Park** - Achieving first place in this competition by presenting a business idea for a part-time job application platform.

PROJECTS

BTN AI : KPR OCR Workflow Platform <i>Full Stack Engineer</i> This project focused on developing an AI-powered OCR workflow platform for mortgage/KPR document intake and assessment. The system was designed to help digitize case creation, document upload, OCR extraction, and review workflows for KPR onboarding documents through an AI-assisted full-stack application. • Developed and maintained full-stack application features using Next.js and Node.js/Express. • Integrated Gemini AI OCR for automated extraction of KTP, KK, NPWP, salary slip, and bank statement documents. • Built case-based workflows for document intake, OCR processing, and result review with editable extraction outputs. • Developed backend APIs and database persistence using Supabase Postgres for case management and audit trails.	Apr 2026 - May 2026
DCKTRP Document Intelligence System Pemprov DKI Jakarta <i>Cloud & Full Stack Engineer</i> This project focused on developing an AI-powered document intelligence and retrieval platform for DCKTRP Pemprov DKI Jakarta. The system was designed to support secure document management, multimodal AI workflows, and scalable infrastructure migration from Google Cloud Platform (GCP) to Amazon Web Services (AWS).. • Developed application features for document upload, retrieval, and secure file management workflows. • Contributed to cloud infrastructure migration from GCP to AWS to support scalable deployment workflows. • Implemented signed URL mechanisms and protected storage access for secure document handling. • Integrated local LLM and embedding workflows using Ollama, Qwen Embedding, and DeepSeek R1 Distill Qwen.	Mar 2026 - Apr 2026

BYD Content Marketing AI

Jan 2026 - Feb 2026

Full Stack Engineer

This project focused on developing an AI-powered creative automation platform for marketing campaign generation. The system was designed to transform a single product asset into multiple marketing contents, including image concepts, captions, and video ideas through AI-driven workflows.

- Developed and maintained full-stack application features using Next.js and Node.js.
- Integrated Gemini AI and computer vision technologies for automated content generation workflows.
- Built prompt-engineering and template-based generation systems for marketing assets.
- Developed backend APIs and responsive frontend interfaces using Tailwind CSS for campaign generation workflows.

Pegadaian AI App

Des 2025 - Jan 2026

Full Stack Engineer

This project focused on developing an AI-powered fintech application for document intelligence and collateral assessment in loan processing workflows. The system was designed to support automated valuation, OCR-based document analysis, and real-time financial simulations for lending decisions.

- Developed a full-stack application using Next.js, Node.js, and Express.
- Implemented OCR and computer vision workflows for collateral assessment and document intelligence.
- Integrated Gemini AI to support automated data extraction and analysis workflows.
- Built real-time loan simulation features and responsive interfaces using rule-based financial models and Tailwind CSS.

AquaCulture : Smart Water Monitoring

Jan 2025 - Jun 2025

Full Stack Developer

This project was part of an internship research focused on developing a water quality monitoring system to support aquaculture ponds. AquaCulture was designed so that both administrators and main users can effectively monitor and manage water quality data.

- Developed a Laravel-based application with CRUD features and REST API.
- Built a role-based system for administrators and main users.
- Designed and managed MySQL as the primary database.
- Successfully completed the system prototype according to research requirements and internship timeline.

Bangun.in – Construction & Home Design Services

May 2025 – Jul 2025

Full Stack Developer

This project is a digital platform that connects customers with construction and home design service providers. Bangun.in simplifies the process of finding, offering, and managing construction or design services through an integrated system.

- Developed a Laravel-based application with a REST API tested using Postman.
- Built a role-based system for administrators, customers (users), and service providers.
- Designed and managed MySQL as the primary database.
- Completed the application prototype according to business needs and scenarios.

MediMe – Pharmacy Management Application

Jun 2025 – Jul 2025

Full Stack Developer

MediMe is a pharmacy management application that helps owners and employees manage drug data and transaction processes. The owner can add medicine data and related information, while employees use the app like a cashier to record sales.

- Developed a mobile application using Flutter for the frontend.
- Built the backend with Laravel and REST API, tested using Postman.
- Implemented CRUD features for medicine and transaction management.
- Designed the architecture with a role-based system (Owner & Employee).
- Integrated the system with MySQL as the main database.

Tanifest – Fresh Produce Marketplace

Apr 2025 – May 2025

Fullstack Developer

Tanifest is an e-commerce platform for purchasing fruits, vegetables, and spice packages online. The application allows customers to easily make transactions, while the admin can manage products and transaction data.

- Developed a Laravel-based application with REST API, tested via Postman.
- Designed a role-based system for admin and customer.
- Implemented CRUD features for product and transaction management.
- Integrated the system with MySQL as the main database.

Fullstack Developer

Kingkos is a web platform for renting various types of clothing, from cosplay costumes to formal wear. The application is designed to make it easy for users to place orders, while administrators can efficiently manage catalogs and transactions.

- Designed and built a Laravel-based application with modular architecture.
- Implemented CRUD for clothing catalogs, order management, and customer data.
- Optimized page performance to ensure fast loading times and smooth user experience.

Frontend Developer

Sunera Teknik is a landing page built to promote household electronics service and maintenance services, providing customers with clear service information, pricing, and contact access.

- Built a responsive and modern landing page using **React** and **TypeScript** with reusable UI components.
- Designed a clean and user-friendly interface to showcase service offerings, work processes, and customer contact information.
- Used SQL Server Management Studio (SSMS) for database management.
- Tested APIs using Postman to ensure system stability.

Frontend

Traco was a project I developed as part of the 2023 Student Creativity Program (PKM) competition, which successfully received funding. The project aimed to support Bandung City in realizing the Smart City concept through a mobile-based smart transportation system.

- Managed version control and code collaboration using Git and GitHub.
- Conducted unit and UI testing to ensure smooth application performance without bugs.
- Developed as part of the 2023 PKM competition, successfully received funding.

EXPERIENCE

Full Stack Engineer Intern

- Developed various proof-of-concept (PoC) systems focused on AI-driven automation and digital solutions.
- Built full-stack web applications to support business process optimization and enterprise workflows.
- Developed OCR-based document intelligence systems for automated document processing and verification.
- Created backend APIs and interactive frontend interfaces for internal and client-based projects.
- Collaborated with data and AI teams to integrate intelligent workflows and automation features into applications.
- Participated in rapid prototyping, system integration, and scalable solution development across multiple business cases.
- Worked with modern web technologies to support AI implementation, data-driven solutions, and digital transformation initiatives.

Agentic AI Program Co-Trainer 2026

- Assisted as a co-trainer and facilitator during the Agentic AI program sessions.
- Supported participants throughout theory discussions and hands-on practical workshops.
- Explored and implemented AI workflows, Agentic AI, Retrieval-Augmented Generation (RAG), and LLM-based solutions using Dify and modern AI tools.
- Contributed to problem-solving discussions and AI implementation based on real-world data workflows.
- Collaborated with mentors and team members to deliver engaging and interactive learning sessions.
- Gained practical experience in AI automation, workflow orchestration, and applied generative AI systems.

Internship

- Developed a real-time water sensor monitoring dashboard using Laravel (full-stack).
- Implemented data visualization and optimized the database for efficient sensor data management.
- Collaborated with the team to integrate IoT concepts into web-based monitoring solutions.

Teaching Assistant Computer Network Structure and Architecture - Telkom University,Bandung <i>Teaching Assistant</i> • Provided supplementary lectures during practical classes. • Explained materials and assisted students in understanding network architecture.	Mar 2023 - Mei 2024
Teaching Assistant Web Programming- Telkom University,Bandung <i>Teaching Assistant</i> • Assisted students in learning web programming concepts, including PHP and related technologies. • Guided practical sessions on backend and frontend development. • Provided code reviews and helped students debug their web applications	Oct 2023 - Mar 2025
Teaching Assistant Fundamentals Of Data Science- Telkom University,Bandung <i>Teaching Assistant</i> • Supported students in understanding the basics of data science. • Introduced concepts such as data preprocessing, exploratory data analysis, and machine learning fundamentals (e.g., KNN). • Assisted in hands-on sessions using Python for data science tasks	Sep 2024 - Apr 2025
Teaching Assistant Advanced Data Science- Telkom University,Bandung <i>Teaching Assistant</i> • Helped students explore advanced data science techniques and artificial intelligence concepts. • Guided practice on implementing machine learning and AI models. • Assisted in projects involving predictive analytics and data-driven applications.	Sep 2024 - Maret 2025
Teaching Assistant Fundamentals of Mobile Device Programming – Telkom University,Bandung <i>Coordinator Teaching Assistant</i> • Assisted students in learning the basics of programming using Dart and the Flutter framework. • Contributed to the development of teaching materials and code examples.	Sep 2023 - May 2024
Student Association of Diploma in Information Systems - Bandung <i>Creative Economy Department Staff</i> • Contacted and negotiated with uniform vendors to obtain the best offers. • Created and managed Instagram posts to promote uniform sales to organization members. • Successfully increased uniform sales through effective digital marketing strategies.	Sep 2023 - Mar 2024
<u>RESEARCHALLIANCE KO+LAB</u> - Bandung <i>Operations Staff</i> • Supervised product quality to ensure customer satisfaction and compliance with hygiene standards. • Strengthened communication and teamwork skills in a dynamic startup environment. • Proactively addressed and resolved operational challenges, enhancing problem-solving abilities.	Oct 2023 - Mar 2024
<u>HACK4ID Logistic</u> - Bandung <i>Competition Participant.</i> • Gained the opportunity to formulate and develop a startup plan with other aspiring founders. • Collaborated with 50 to 60 professional participants from various industries. • Sharpened skills in developing effective and innovative startup strategies.	Jun 2023
Dies Natalies Diploma Sistem Informasi - Bandung Deputy Head of Division. • Created an Instagram filter related to the event. • Documented all event activities.	Des 2023

CERTIFICATION	
• AWS Cloud Practitioner Essentials	<u>Open</u>
• Get Started with Databricks for Data Engineering	<u>Open</u>
• Data Ingestion with Lakeflow Connect	<u>Open</u>
• Build Data Pipelines with Lakeflow Spark Declarative Pipelines	<u>Open</u>

SKILLS

- **Soft Skills:** Public Speaking, Technical Presentation, Pitching, Communication, Team Collaboration, Problem Solving, Analytical Thinking, Time Management, Task & Project Management, Adaptability
- **Hard Skills:**
 - Programming Languages: JavaScript/TypeScript, PHP, Python, Dart, Java, Kotlin, C#
 - Frameworks & Technologies: Next.js, React.js, Node.js, Express.js, Laravel, Flutter, Tailwind CSS
 - AI & Data Technologies: Gemini AI, OCR Integration, RAG, Ollama, LLM Integration, Prompt Engineering, Computer Vision
 - Database & Storage: PostgreSQL, MySQL, SQLite, Firebase Realtime Database, Supabase, SQL Server Management Studio (SSMS)
 - Cloud & DevOps: AWS, Google Cloud Platform (GCP), REST API, JSON, Cloud Storage, Signed URL Workflow
 - Development Tools: Git, GitHub, Postman, Jira, Trello, Figma, Docker (basic)
 - Other Skills: Full Stack Development, API Integration, Database Design, Responsive UI Development, System Integration.
